## GateOne® Seating

This beam-mounted tandem seating has a contemporary appearance and low cost of ownership while offering incredible durability and comfort.

### Contemporary Design

Each element of GateOne was designed to minimize complexity, both visual and functional. Its clean, classic geometric shapes work well with a variety of architectural styles.

### Long-Term Value

GateOne seating is easy - easy to install, easy to maintain, easy to clean. All components are designed to provide low cost of ownership.

Each element attaches to the beam with one bolt for simplified installation and reduced labor costs. Mechanical fasteners are hidden and fabric seams are unobtrusive to ensure long wear and reduce maintenance. And, it's covered by KI's ten-year warranty.

### High Comfort

A spacious 22" wide seat with a high backrest provides outstanding comfort and lumbar support while allowing the user to sit in a relaxed position. Generous cushioning and smooth edges eliminate pressure points.

### Strong visual statement.

Designed to meet the heavy use of airports, GateOne beam-mounted, tandem seating also works well in healthcare and education environments – any place durable, contemporary multiple seating is desired. Units are available with one through five seats. Options include arms or armless; inline, end-of-run, or corner tables; back-to-back or side-to-side ganging; wallsaver brackets; and a wide variety of fabrics and finishes.

Elevated mounting beam allows ample room for easy cleaning.

Seats and backs can be replaced in the field with in-line tables.

Seats change out quickly, allowing seat appearance to be renewed easily.
