

Reclaim Centers and Containers. Take back your environment.

- Discreetly convenient
- Aesthetically agreeable
- Perfectly practical

■ What's better for the Earth's environment is better for yours, too.

**Choose between individual containers or a single recycling center.**

Lift-off tops make containers and centers easy to empty and clean out.

Containers (as shown above) are available in four different sizes.

Individual containers are square with radiused corners.

Recycling centers are rectangular and feature two, three or four openings.

Liners are standard with the recycling center and optional with individual containers.

Structural integrity is assured by KI's unmatched 10-year warranty.

No confusion.

Don't worry about users putting the wrong items in the wrong containers. To identify contents, each individual container has a clear, easy-to-read label. Your containers or centers can be labeled in any sequence or combination for paper, cans, glass, plastic or waste. Both the labeling and the recycling logo are available in black or white.

**Reclaim® Recycling Centers and Containers**

Reclaim recycling units are proof that what's good for the Earth's environment can look good in your environment, too. Whether it's a cafeteria, break room, student center, library, arena or any other area – you can specify recycling containers and centers that easily blend in and complement their surroundings.

The natural fit.

The look is clean. Simple. Unobtrusive. You can use Reclaim recycling elements indoors or out. They fit any setting, because you can specify a finish that matches the style and color themes you've already established. In fact, when you order Reclaim centers and containers, you choose from more than 50 standard KI fiberglass colors and finishes.
