

ValueLite™ Folding Table ■

KI ValueLite Folding Table. Move it!

- Durable enough for rugged use.
- Easy to lift and carry.
- Low cost for exceptional value.

**WORKING
FOR
YOU**

■ **The reaction factor ... now you need it, then you don't.**

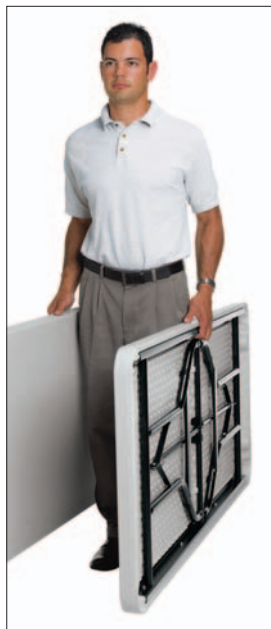

Set it up. Tear it down. Quickly. Safely.

Even when you're rushed because set-up time is limited, you can easily handle ValueLite tables. Their durable, lightweight construction makes them exceptionally easy to carry. Rounded edges make them easier to handle. And ValueLite tables stack easily and store flat because the seam-welded tubular steel legs fold within the frame.

Easy does it! Easy to move and easy to stack, lightweight ValueLite tables reduce set-up and tear-down time. Those doing the work use less effort, with less strain and have less chance of injury.

Tough enough! High-impact polyethylene tops. Blowmolded construction. Impact resistant corners. Heavy-duty steel frames. ValueLite tables withstand years of rugged use ... and KI backs that up with a 10-year warranty.

ValueLite Tables.

Flexible space usage. Easy handling. For spaces where tables are sometimes needed (and sometimes not), versatile ValueLite folding tables let you respond to shifting needs. You can set up for the science fair one evening and a committee meeting the next. All the features you want and the ease of handling you need. ValueLite tables make set up and tear down a breeze for school events, meetings, and more.

Perfect indoors and out! ValueLite tops have UV inhibitors to prevent fading and the frames have a scratch-resistant all-weather finish. They won't crack, chip or peel. So whether you're setting up in the gym or on the grounds, ValueLite tables are your most practical choice.

ValueLite tables are available in 60", 72" and 96" rectangular lengths and 60" round.
