

FEATURES:

- Solid Beech or Maple Frames
- Structural Steel Seat Frame
- Field Recoverable Option
- Clean Out
- Replaceable Components
- Flex Back
- Wall-Saver Design
- Antimicrobial Finish
- Urethane Arm Cap Option
- Life Time Warranty

Configuration from L to R:
 JOR2-G440PS
 JOR4-LKCR90
 JOR2-PC21X20PS
 JOR4-LKCR90
 JOR2-G300PS
 JOR4-36D-16 - Freestanding Table

Replaceable seats and backs, as well as replaceable seat and back covers, and a full range of other replacement components – all designed to be quickly field-installed – allow damaged and degraded components and materials to be easily restored at low cost.

Jordan has been constructed to withstand the rigors of healthcare environments, and has been extensively tested to levels that well exceed established industry standards. Krug stands behind this collection with a lifetime warranty.

Jordan is an extensive collection, shown in four product brochures: Guest and Bariatric Seating, Patient Seating, Lounge Seating, and Multiple Seating and Tables.

| | 21" Seat | 24" Seat | 30" Bariatric | 44" Bariatric | |
|----|----------|----------|---------------|---------------|------------------------|
| W | 25" | 28" | 34" | 48" | Width |
| D | 27" | 27" | 27" | 27" | Depth |
| H | 34.25" | 34.25" | 34.25" | 34.25" | Height |
| SH | 18.5" | 18.5" | 18.5" | 18.5" | Seat Height from floor |
| AH | 26" | 26" | 26" | 26" | Arm Height from floor |
| WA | 20.5" | 23.5" | 29.5" | 43.5" | Width between Arms |
| SD | 19" | 19" | 19" | 19" | Seat Depth |

NOTE: All dimensions listed are for Start units only. For Centre and End units subtract 2.25" from the overall Width (W).
 Krug offers an extensive range of furnishings for private office and conferencing, and a comprehensive seating collection. A company-wide program is in place to reduce the impact of our products and processes on the environment. For a copy of this program, or more information about products, please contact your local Krug representative, or Krug Customer Service.

Designed in collaboration with several leading healthcare architects, designers, and professionals, Jordan is a collection that transcends conventional healthcare seating. A comprehensive research and design process has yielded a heightened level of aesthetic beauty, combined with exceptional ergonomic support and sitting comfort.

Jordan – defined as a “healing river” in ancient times – utilizes research-based curvature in both the seat and back to encourage correct yet comfortable sitting posture, with pronounced support for the lumbar and thoracic regions. “Waterfall” seat fronts and a canted seat angle are designed to help prevent discomfort for the user’s hips and legs, promote good circulation while in a seated position, and assist ingress and egress. A slight flexing action in the back promotes an upright sitting position that is still pleasingly comfortable.

Jordan Multiple Seating is designed for fast, easy installation – and reconfiguring. A simple yet very strong fastening system allows product to be quickly and easily moved, re-installed, added onto, or reconfigured in a different layout. Linking tables can be dropped into, or removed from, multiple seating configurations without taking the seating units apart, and without defacing the seat frames. Tables are universal and non-handed, so can be changed to a reverse position.

All Jordan products are Greenguard certified, and have been designed to achieve reduced environmental impact: steel and foam components utilize recycled, and recyclable, materials, and wood materials are sourced from certified, managed forests that utilize sustainable forest management practices. Krug maintains a comprehensive program of environmental practices that is measurably reducing the environmental footprint of the company and its products.

CLEAN OUT

All Jordan seating models have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

METAL TO METAL CONNECTION

Steel seat frames are joined to other components, and to each other in the multiple seating products, with hardened steel bolts and inserts, ensuring exceptional durability and strength, and easy reconfigurability, as well as on-site replacement of damaged or degraded components

URETHANE ARM CAP

Jordan’s contoured and sculpted arms of Beech or Maple’s durability can be enhanced with an optional urethane arm cap. Routed top arm receives the inset cap to maintain the defined horizontal line as seen in the profile view. These caps are field replaceable if the need ever arises.

REPLACEABLE SEAT & BACK COVERS

Jordan Multiple Seating can be specified with removable and replaceable seats and covers, to allow for cleaning, repair and replacement of upholstery. Complete seats and backs can also be easily field-replaced.

RECTILINEAR TABLES

Jordan linking tables are uniquely designed so that they can be dropped into, and removed from, a multiple seating configuration - without taking the seating units apart, or defacing the adjoining seat frames. These tables are universal and non-handed, so can be used in a reverse position.

CURVILINEAR TABLES

Several table options are available that allow for a change in direction within the multiple seating configuration, and allow it to follow the contours of a room.

FREESTANDING TABLES

A selection of occasional tables are designed to complement Jordan multiple seating, as well as Jordan guest and lounge seating.

PLASTIC LAMINATE & PVC EDGES

In addition to wood veneer tops with solid wood edges, Jordan linking and freestanding occasional tables are available with plastic laminate tops, with both solid wood and PVC edges.

The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter’s movement and body weight as they move into and out of the chair.

Jordan features a proprietary anti-microbial finish, which actively resists the growth of germs, microbes and bacteria. These anti-microbial properties, combined with the exceptional strength, marring and chemical resistance of Krug’s Enduraguard finish system, provide a wood surface coating that is uniquely suited to the demands of a healthcare environment.
