

CLEAN OUT

All Jordan seating models have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

STEEL SEAT FRAME

The structural seat frame is made from welded steel with a powder-coated finish that allows Jordan to well exceed ANSI/BIFMA standards. This seat structure also allows damaged arm and leg frame components to be replaced without replacing the entire frame or unit, while allowing the back to have a slight flexing action.

WALL SAVER

The angle of the back and the rear legs are designed to keep the back away from the wall, to prevent wear and damage to both the chairs and to the walls of the facility.

REPLACEABLE SEAT & BACK COVERS

Jordan Patient Seating can be specified with removable and replaceable seats and covers, to allow for cleaning, repair and replacement of upholstery. Complete seats and backs can also be easily field-replaced.

URETHANE ARM CAP

The optional arm cap provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded.

ANTI-MICROBIAL FINISH

Krug's uniquely-formulated anti-microbial finish inhibits the growth of molds and mildews. Surfaces coated in this finish will have reduced fungal growth, and spores from germs, microbes and bacteria will not multiply on the wood.

JORDAN OTTOMAN
JOR-5 – OTTOMAN

Designed in collaboration with several leading healthcare architects, designers, and professionals, Jordan is a collection that transcends conventional healthcare seating. A comprehensive research and design process has yielded a heightened level of aesthetic beauty, combined with exceptional ergonomic support and sitting comfort.

FEATURES:

- Solid Beech or Maple Frames
- Structural Steel Seat Frame
- Field Recoverable Option
- Clean Out
- Replaceable Components
- Flex Back
- Wall-Saver Design
- Antimicrobial Finish
- Urethane Arm Cap Option
- Life Time Warranty

JORDAN 21" PATIENT WITH HEADREST
JOR2-P21OPS
JOR2-RHR21 – HEADREST

Jordan – defined as a “healing river” in ancient times – utilizes research-based curvature in both the seat and back to encourage correct yet comfortable sitting posture, with pronounced support for the lumbar and thoracic regions. “Waterfall” seat fronts and a canted seat angle are designed to help prevent discomfort for the user’s hips and legs, promote good circulation while in a seated position, and assist ingress and egress. A slight flexing action in the back promotes an upright sitting position that is still pleasingly comfortable.

All Jordan products are GREENGUARD™ certified, and have been designed to achieve reduced environmental impact: steel and foam components utilize recycled, and recyclable, materials, and wood materials are sourced from certified, managed forests that utilize sustainable forest management practices. Krug maintains a comprehensive program of environmental practices that is measurably reducing the environmental footprint of the company and its products.

The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter’s movement and body weight as they move into and out of the chair.

Jordan features a proprietary anti-microbial finish, which actively resists the growth of germs, microbes and bacteria. These anti-microbial properties, combined with the exceptional strength, marring and chemical resistance of Krug’s Enduraguard finish system, provide a wood surface coating that is uniquely suited to the demands of a healthcare environment.
