AIRCONE

DESIGNER	Stefan Borselius
CONTENT	Core: 100% Molded Polyester Felt Cover: 100% Polyester Felt (Air Series) or 100% Virgin Wool (Blazer)
THICKNESS	3.3"
DIMENSIONS	20" (h) x 18.7" (w)
WEIGHT	0.35 lbs
FLAMMABILITY	Inquire
ACOUSTIC	NRC: 0.85

APPLICATION Wall, Ceiling

DESCRIPTION Aircone is a sound absorbing module with a simple triangular design that is angled and tapered to permit sound diffusion. Component modules are made from molded polyester felt fiber and are available in many colorways. Half modules are also available to create straight edges in a design.

BENEFITS

Designed for the Environment: Aircone is manufactured on the basis of technical, environmental and production ethical requirements. There are no emissions to air, water or land during the production of Aircone. The sound-absorbent core of Aircone contains recycled materials. Aircone is recyclable.

Installation: Aircone may be mounted to the ceiling or wall with a straight rail in three lengths, 59", 78.75" or 118". Those rails can be joined or cut on site. Modules hook into one another using small plastic clips creating screen partitions.

Improved Sound Absorption: Aircone is ideal for high frequency absorption and achieves an NRC 0.85

Accessories Provided: Drop ceiling brackets to mount Aircone directly to a drop ceiling. A wire kit which includes (4) 118" wires, (4) wire locks and hardware to hang the rail a distance from the ceiling. A roller is also available allowing the Aircone modules roll along the rail, used in lieu of attachment clips.
