APPLICATION Floor or Wall (half trees)

DESCRIPTION Lovi Acoustic Trees and Lovi Acoustic Spruce Trees not only make a beautiful visual statement but also absorb sound. The product line includes up to 157.5" tall acoustic sound-absorbing trees and spruce trees made entirely from recycled plastic bottles.

BENEFITS

Designed for the Environment: The acoustic felt used to create Lovi Acoustic Trees are 100% recycled plastic bottles.

Ease of Installation: Lovi Acoustic Trees are easily assembled and can be placed on any floor surface. The trees are light and very portable. Half trees may be mounted to walls with the use of only one screw.

Improved Sound Absorption: Lovi Acoustic Trees are ideal for high-frequency absorption.

Recyclable: The materials in Lovi Acoustic Trees are recyclable, either as material recycling, or energy recovery.

Pot Base: Lovi Acoustic Trees and Lovi Acoustic Spruce Trees have an optional large (26" diameter x 10.6" height) or small (17.3" diameter x 7" height) pot base in either white or black finished steel. The interior of the pot is a birch plywood insert which allows the trees to slide in. The pots are for use with the larger, 47.2" & 70.8" tall trees.
